

DDC is pleased to announce that our **Certainty™ Non-Invasive Prenatal Paternity** (NIPP) DNA test has recently been accredited by the AABB (American Association of Blood Banks). *AABB* is the global leader in standards development, accreditation, and implementation of quality systems in transfusion medicine and cellular therapies. *AABB* has an unwavering focus on donor and patient safety through its accreditation process.

Only DDC maintains such strict standards of accountability for prenatal paternity testing, including analysis, PhD review, and documentation. **This is the first, and only, AABB-accredited NIPP test and DDC is the only AABB-accredited laboratory to offer it.**

About This Test:

- The **Certainty™ Non-Invasive Prenatal Paternity** test provides accurate results you can trust in as few as 3 business days
- The test is completely safe for the mother and pregnancy and can be performed as early as **7 weeks'** gestation
- **Certainty™**, with court-admissible results, is the **only** AABB-accredited prenatal test, which means our processes meet strict standards for excellence and accountability
- DNA-collection for **Certainty** requires only a simple blood sample from the mother and cheek swab from the possible father
- This test provides 99.9% probability-of-paternity results or higher for inclusions and 0% probability of paternity results for exclusions, just like a postnatal paternity test
